U.S. Citizen

EDUCATION

- Georgia Institute of Technology** Atlanta, Georgia
Bachelor of Science - Computer Science (Cybersecurity and Intelligence) August 2023 - May 2026

SKILLS

- Languages:** Python, Java, JavaScript, TypeScript, C, .NET, SQL, Bash, YAML
- AI/Agents:** LangChain, LLM Agent Orchestration, RAG, LLM Evaluation, MCP, TensorFlow, XGBoost
- Frameworks:** React, React Native, Node.js, FastAPI, .NET Core, Agile
- Platforms:** Docker, Git, Linux, Google Cloud Platform, Azure DevOps, CI/CD

EXPERIENCE

- IBM** San Jose, California
Software Developer August 2026 - Present
 - Production Agentic Skill:** Shipped the ServiceNow skill for IBM's enterprise Z operations AI platform: 13 Python tools and 25 routing workflows spanning the full incident, change-request, and CMDB lifecycle - creation, assignment, resolution, risk and impact transitions, CI-to-application mapping, and upstream/downstream dependency traversal. Raised acceptance pass rate from 81% to 94%.
 - On-Premises Semantic Search:** Built embedding-based duplicate-incident detection on sentence-transformers and ChromaDB running fully on-premises, meeting IBM network compliance by keeping all model inference local with zero external API calls.
 - Hallucination-Resistant Evaluation Infrastructure:** Authored a 700-line ground-truth grader with 13 assertion types that verifies agent output against live ServiceNow state rather than keyword matching, plus 4 harness extensions for credential injection and pre-run state snapshots - now gating a 75-case benchmark on every release.
 - Cross-System Agent Orchestration:** Unified Concert for Z mainframe telemetry, ServiceNow CMDB, and Zen Agent RCA so a single natural-language prompt correlates operational anomalies to change requests, detects unauthorized changes, and computes dependency blast radius across 6,000+ configuration items.
- United Parcel Service (UPS)** Atlanta, Georgia
Software Engineering Intern June 2025 - August 2025
 - End-to-End Health Dashboard:** Developed end-to-end analytics product (.NET Core, GCP BigQuery/GCS) for autonomous SQL parsing, boosting operational visibility and failure detection by 60% across global scanning systems, advancing the Smart Package Smart Facility initiative.
 - Proactive System Monitoring:** Enhanced proactive system monitoring, using Looker Studio dashboards and 7-day historical analysis for immediate corrective action on critical operations.
- iVue** Atlanta, Georgia
Software Engineering Intern December 2023 - June 2024
 - Drone Network Infrastructure:** Advanced drone network infrastructure to monitor and control devices around the world, resulting in 75% improvement in global operational efficiency while ensuring real-time data collection and device management.
 - Central Drone Control Website:** Designed a central drone control website using Vue frontend and Python backend streamlining remote monitoring and operations.

PROJECTS

- Lumos AI - Real-Time Safety Intelligence Platform:** Computes personalized safety scores for any U.S. address via a 25-feature XGBoost model trained on 80+ GB of FBI data from 12,000+ agencies, fetching 11+ APIs in parallel. Includes an AI emergency operator that places 911 calls through VAPI and segment-level route analysis. — **Tech:** React, FastAPI, XGBoost, Gemini, Firebase — [lumos-safety.netlify.app](#)
- Syllabi.dev - AI-Powered Syllabus Management Platform:** Parses course data, assignments, and deadlines from PDFs and images using Gemini, then aggregates them into a multi-course dashboard with Google/Outlook/Apple calendar sync and paid AI study-plan generation. 20+ users. — **Tech:** React, TypeScript, Firebase, Gemini API, Stripe — [syllabi.dev](#)
- SyncSpec - Real-Time Collaborative API Designer:** Collaborative JSON schema editor supporting zero-conflict simultaneous editing through Y.js CRDTs and WebSocket sync, with live TypeScript generation and user presence tracking. — **Tech:** React, TypeScript, Y.js, Monaco Editor, Node.js — [syncspec.netlify.app](#)
- MedX - AI Health Management System:** Drug-interaction checker combining Gemini and OpenFDA for real-time risk assessment, synthesizing user logs into personalized PDF medical reports with OCR and barcode scanning. 2nd Place, Hacklytics. — **Tech:** React Native, OpenFDA, Firebase, Gemini — [devpost.com/software/medx-d7tle6](#)
- CodeWall - Productivity Chrome Extension:** Manifest V3 extension with 40+ installs that gates distracting sites behind coding challenges in 4 languages, executed in a sandbox via the Piston API with Gemini-backed hints. — **Tech:** JavaScript, Firebase, Piston, Ace Editor, Gemini API — [Chrome Web Store](#)
