EDUCATION

- Georgia Institute of Technology** Atlanta, Georgia
• *Bachelor of Science - Computer Science (Cybersecurity and Intelligence)* August 2023 - May 2026

SKILLS

- **Languages:** Python, Java, JavaScript, C, .NET, SQL, Bash
- **Frameworks:** TensorFlow, Scikit, Keras, React, React Native, Node.js,
- **Platforms:** Docker, Git, Linux, Google Cloud Platform, Azure DevOps

EXPERIENCE

- United Parcel Service (UPS)** Atlanta, Georgia
• *Software Engineering Intern* June 2025 - August 2025
 - **End-to-End Health Dashboard:** Developed end-to-end analytics product (.NET Core, GCP BigQuery/GCS) for autonomous SQL parsing, boosting operational visibility and failure detection by 60% across global scanning systems, advancing the Smart Package Smart Facility initiative.
 - **Proactive System Monitoring:** Enhanced proactive system monitoring, using Looker Studio dashboards and 7-day historical analysis for immediate corrective action on critical operations.
 - **Gemini Integration:** Integrated Gemini to provide valuable insights of JSONified data, utilizing Google Cloud Run to periodically iterate through data and produce logs.
- iVue** Atlanta, Georgia
• *Software Engineering Intern* December 2023 - June 2024
 - **Drone Network Infrastructure:** Advanced drone network infrastructure to monitor and control devices around the world, resulting in 75% improvement in global operational efficiency while ensuring real-time data collection and device management.
 - **Central Drone Control Website:** Designed a central drone control website using Vue frontend and Python backend streamlining remote monitoring and operations.
- Solutionz Security, Inc.** Atlanta, Georgia
• *Cybersecurity Intern* January 2023 - May 2023
 - **Deep Fake Research:** Conducted extensive research on deep fake technology and ways to counteract auditory & visual impersonation.
 - **Security Algorithm Design:** Aided in designing algorithms to beat hefty digital security attacks as mentioned above.
 - **TedX Talk & ML Demonstration:** Used research to help deliver a TedX talk amidst an audience of over 70+, advising ways to stay safe on the internet, indicating how to acknowledge suspicious behavior, and demonstrating personal face detection Machine Learning project to highlight the creation of deepfakes.

PROJECTS

- **Syllabi.dev - AI-Powered Syllabus Management Platform (AI/ML, Full-Stack, Cloud):** Intelligent syllabus parser using Google Gemini AI to extract course data, assignments, and deadlines from PDFs, images, and text, featuring a unified multi-course dashboard with calendar aggregation, ICS calendar subscription sync (Google Calendar/Outlook/Apple), and Pro features including AI study plan generation, assignment breakdown, and cross-course insights. Tech: React, TypeScript, Firebase (Firestore, Functions, Auth), Google Gemini API, Stripe, Vite, Tailwind CSS (<https://syllabi.dev/>)
- **SyncSpec - Real-Time Collaborative API Designer (Real-Time Systems, CRDT, Full-Stack):** Collaborative JSON schema editor with zero-conflict simultaneous editing using Y.js CRDT and WebSocket synchronization, featuring live TypeScript generation and Monaco Editor with user presence tracking. Tech: React, TypeScript, Y.js, Monaco Editor, WebSocket, Node.js (<https://syncspec.netlify.app/>)
- **CodeWall - Productivity Chrome Extension (Browser Extension, Code Execution, AI):** Manifest V3 Chrome extension blocking distracting websites with coding challenges across 4 languages using Piston API for sandboxed execution, integrating Ace Editor and Google Gemini for AI assistance. Tech: JavaScript, Firebase, Piston API, Ace Editor, Gemini API (Chrome Web Store)
- **EcoShip - Sustainable Logistics Platform (Microservices, Mobile Development, AI):** Microservice backend with React Native app executing carbon emission algorithms across 15+ shipping corridors with sub-100ms latency, implementing eco-efficiency scoring weighing cost-effectiveness (70%) against environmental impact (30%). Tech: Python, FastAPI, Docker, React Native, Gemini API (github.com/hxxtsxxh/EcoShip)
- **MedX - AI Health Management System (Mobile Development, AI, Cloud):** AI-driven drug interaction checker integrating Gemini and OpenFDA APIs for real-time risk assessments, leveraging Generative AI to synthesize user logs into personalized PDF medical reports with OCR/barcode scanning. Tech: React Native, Gemini API, OpenFDA, Firebase (devpost.com/software/medx-d7tle6)
- **Trace AI - Choreography Attribution Tool (Full-Stack, Computer Vision):** Full-stack choreography attribution tool embedding TensorFlow pose estimation to analyze joint transformations in dance videos, utilizing Intersection Observer API for viewport-based model inference. Tech: React, MongoDB, Firebase, TensorFlow (devpost.com/software/trace-ai)
- **CommuRide - Community Carpooling Platform (Mobile Development, Real-Time Systems):** Geolocation-based carpooling platform implementing reverse geocoding for proximity-based rider-driver matching with real-time Firebase synchronization for live seat availability and SMS multi-factor authentication. Tech: React Native, Google Maps API, Firebase (devpost.com/software/commuride)
