U.S. Citizen

EDUCATION

- Georgia Institute of Technology** Atlanta, Georgia
• *Bachelor of Science - Computer Science (Cybersecurity and Intelligence)* August 2023 - May 2026

SKILLS

- **Languages:** Python, Java, JavaScript, C, .NET, SQL, Bash
- **Frameworks:** TensorFlow, Scikit, Keras, React, React Native, Node.js, Agile
- **Platforms:** Docker, Git, Linux, Google Cloud Platform, Azure DevOps

EXPERIENCE

- United Parcel Service (UPS)** Atlanta, Georgia
• *Software Engineering Intern* June 2025 - August 2025
 - **End-to-End Health Dashboard:** Developed end-to-end analytics product (.NET Core, GCP BigQuery/GCS) for autonomous SQL parsing, boosting operational visibility and failure detection by 60% across global scanning systems, advancing the Smart Package Smart Facility initiative.
 - **Proactive System Monitoring:** Enhanced proactive system monitoring, using Looker Studio dashboards and 7-day historical analysis for immediate corrective action on critical operations.
 - **Gemini Integration:** Integrated Gemini to provide valuable insights of JSONified data, utilizing Google Cloud Run to periodically iterate through data and produce logs.
- iVue** Atlanta, Georgia
• *Software Engineering Intern* December 2023 - June 2024
 - **Drone Network Infrastructure:** Advanced drone network infrastructure to monitor and control devices around the world, resulting in 75% improvement in global operational efficiency while ensuring real-time data collection and device management.
 - **Central Drone Control Website:** Designed a central drone control website using Vue frontend and Python backend streamlining remote monitoring and operations.
- Solutionz Security, Inc.** Atlanta, Georgia
• *Cybersecurity Intern* January 2023 - May 2023
 - **Deep Fake Research:** Conducted extensive research on deep fake technology and ways to counteract auditory & visual impersonation.
 - **Security Algorithm Design:** Aided in designing algorithms to beat hefty digital security attacks as mentioned above.
 - **TedX Talk & ML Demonstration:** Used research to help deliver a TedX talk amidst an audience of over 70+, advising ways to stay safe on the internet, indicating how to acknowledge suspicious behavior, and demonstrating personal face detection Machine Learning project to highlight the creation of deepfakes.

PROJECTS

- **Syllabi.dev - AI-Powered Syllabus Management Platform:** Intelligent syllabus parser using Gemini API to extract course data, assignments, and deadlines from PDFs, images, and text. Features include unified multi-course dashboard with calendar aggregation, calendar subscription sync (Google Calendar/Outlook/Apple), and Pro features for AI study plan generation, assignment breakdown, and cross-course insights. 20+ users — **Tech:** React, TypeScript, Firebase (Firestore, Functions, Auth), Google Gemini API, Stripe, Vite, Tailwind CSS — syllabi.dev
- **SyncSpec - Real-Time Collaborative API Designer:** Collaborative JSON schema editor with zero-conflict simultaneous editing using Y.js CRDT and WebSocket synchronization. Features live TypeScript generation and Monaco Editor with user presence tracking. — **Tech:** React, TypeScript, Y.js, Monaco Editor, WebSocket, Node.js — syncspec.netlify.app
- **CodeWall - Productivity Chrome Extension:** Manifest V3 Chrome extension with 40+ installations that blocks distracting websites with coding challenges across 4 languages using Piston API for sandboxed execution. Integrates Ace Editor and Google Gemini for AI assistance. — **Tech:** JavaScript, Firebase, Piston, Ace Editor, Gemini API — [Chrome Web Store](https://chrome.google.com/webstore/detail/codewall)
- **EcoShip - Sustainable Logistics Platform:** Microservice backend with React Native app executing carbon emission algorithms across 15+ shipping corridors with sub-100ms latency. Implements eco-efficiency scoring weighing cost-effectiveness (70%) against environmental impact (30%). — **Tech:** Python, FastAPI, Docker, React Native, Gemini API — [Github](https://github.com)
- **MedX - AI Health Management System:** AI-driven drug interaction checker integrating Gemini and OpenFDA for real-time risk assessments. Leverages AI to synthesize user logs into personalized PDF medical reports with OCR/barcode scanning. Won 2nd Place in Hacklytics. — **Tech:** React Native, OpenFDA, Firebase — devpost.com/software/medx-d7tle6
- **Trace AI - Choreography Attribution Tool:** Full-stack choreography attribution tool embedding TensorFlow pose estimation to analyze joint transformations in dance videos. Utilizes Intersection Observer API for viewport-based model inference. — **Tech:** React, MongoDB, Firebase, TensorFlow — devpost.com/software/trace-ai
- **CommuRide - Community Carpooling Platform:** Geolocation-based carpooling platform implementing reverse geocoding for proximity-based rider-driver matching with real-time Firebase synchronization for live seat availability and SMS multi-factor authentication. — **Tech:** React Native, Google Maps API, Firebase — devpost.com/software/commuride
